Webapp

# Flytransfer

Es una startup de traslados privados en Cancún, México. Tenían una webapp funcional pero genérica, creada a partir de un template, difícil de usar en celular y que no transmitía lo que realmente son: un servicio premium.

## Algunas reflexiones

Flytrasfer fue uno de mis proyectos favoritos porque, a pesar de una webapp, tuve toda la libertad creativa para probar una estética diferente y que, al final, terminó por lograr lo que necesitaba: verse y sentirse premium.
